#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 12-14, drawn to a method comprising applying a furin inhibitor to a site of a wound or a fibrotic disorder or fibrosis may occur.

Group II, claim(s) 8-11, 15-17, drawn to a method of inhibiting the generation of TGF-beta 1 applying a furin inhibitor.

According to PCT Rule 13.2, unity of invention exists only when the shared or corresponding technical feature is a contribution over the prior art. The inventions listed as Groups I and II do not relate to a single general inventive concept because they lack the same or corresponding special technical feature. The technical feature of Group II is a method of inhibiting the generation of TGF-beta 1, which is shown by WO-9217206 of Ferguson. The reference discloses that use of specific growth factor neutralizing agents against TGF-beta 1 in wound healing to inhibit scarring. Therefore, group II invention does not make a contribution over the prior art. Therefore, inventions listed as groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. Hence the inventions I and II lacks unity of invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### *Election of Species*

This application contains claims directed to the following patentably distinct species: furin inhibitors. The species are independent or distinct because the different furin inhibitors are chemically distinct compounds.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of furin inhibitor (if the furin inhibitor is a peptide sequence, applicants are required to identify the peptide with a SEQ ID NO.) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 1-4 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Claim 13 is generic to the following disclosed patentably distinct species: species of different fibrotic disorder. The species are independent or distinct because they etiology of the

disease condition is different and affects different patient population. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of fibrotic disorder, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
